REVISED PLANNING OUTLINE

Discussion Outline

- Review Meeting Objectives
- Review Objectives, Strategies & Considerations

Creating Income and Building Economic Value

- Currently
- Long term
- Unexpected Scenarios

Discuss Strategy for Impacting Heirs

- Currently
- Long term
- Unexpected Scenarios

Create a Healthy Income

Objective and Strategy Details

- Throughout the lives of John & Jane, maintain an after-tax income of \$250,000 before retirement & \$250,000 after retirement
- Currently income will be created through working in the business. In the future income will be created by the business and liquid assets John & Jane have built.
 - See the section on building economic value outside of yourself for details
- In the event of John's death, create the liquidity needed to
 - Maintain an after-tax income of \$250,000
 - Pay off \$371K of the debt below

Auto Loan	\$20,000	2.19%
Credit Card	\$500	0%
Mortgage	\$350,000	3.5%
Total	\$370,500	

- Create college reserve of \$200K (4 years @ \$25K for Michael and 4 years @ \$25K for Elizabeth)
- In the event of Jane's death, create the liquidity needed to
 - Maintain an after-tax income of \$250,000
 - Pay off \$371K of the debt below

Auto Loan	\$20,000	2.19%
Credit Card	\$500	0%
Mortgage	\$350,000	3.5%
Total	\$370,500	

- Create college reserve of \$200K (4 years @ \$25K for Michael and 4 years @ \$25K for Elizabeth)
- Maintain a minimum of \$5.4M death benefit on John
- Maintain a minimum of \$5.4M death benefit on Jane

Additional Considerations

- Examine income and liquidity available in the event of John's death
\$6,090,000 Before Taxes @ 5% = \$304,500 Annually Before Taxes

See the financial snapshot at John's death

Consider obtaining an additional \$400K of death benefit on John to maintain a total of \$5.4M to meet your liquidity objectives in the event of John's death.

- Examine income and liquidity available in the event of Jane's death

\$4,400,000 Before Taxes @ 5% = \$220,000 Annually Before Taxes

See the financial snapshot at Jane's death

Consider obtaining an additional \$1.9M of death benefit on Jane to maintain a total of \$5.4M to meet your liquidity objectives in the event of Jane's death.

Build Value Outside Yourself

Objective and Strategy Details

- John & Jane desire to continue to build economic value outside of their ability to work.
 - For the next 17 years, income will be drawn from working in the business while the business value & liquidity continues to grow.
 - In the 18th year, accumulated liquidity will be used to generate some or all of the income needed to maintain \$250,000 annually (Before Tax).
 - For example liquidity of \$5,000,000 earning an assumed rate of 5% annually, could be used to provide a pretax income of \$250,000 annually dependent upon distribution strategy. Additional liquidity may be desired to offset potential income tax liability.
 - Based on a starting amount of \$1,090,000 growing at an assumed rate of 8% annually and adding \$75,000 annually from cash flow, you would have liquid assets totaling \$5,000,000 in 14 years
 - [See Growth Chart for details](#)
 - Other sources of income could include social security, business and consulting income.
 - Other variables that could impact your income stream are increasing savings, decreasing expenses, sale of real estate and overall investment strategy.
- Overall investment strategy
 - Based on business and personal assets, risk tolerance and time horizon, John and Jane wish to keep their liquid assets allocated 20% variable and 80% fixed.
 - Factors such as tax volatility, interest rates, and behavioral and fundamental market dynamics should be incorporated into the overall strategy.

Additional Considerations

- Align your asset allocation and management strategy to better reflect the accumulation and distribution objectives above, taking into consideration
 - Tax diversification
 - Interest Rates
 - Behavioral and Fundamental Economics
 - Spending habits and possible liquidity needs

Build Value Outside Yourself

- Business Assets
 - Create the liquidity needed to buyout the business interest in the event of a partner's death.
 - Create the liquidity needed to help absorb the loss of your key employees.
 - Create a deferred compensation plan for your key employees to both reward their loyalty and protect your investment in them.

Additional Considerations

- Obtain life insurance death benefit on each partner.
- Execute a formal buy/sell agreement.
- Obtain life insurance death benefit on key employees.
- Execute a Deferred Compensation Plan for key employees.
- Set up the informal funding for the Deferred Compensation Plan.

Balance Inheritance to Provide Opportunities

Objective and Strategy Details

- During the lives of John and Jane, they wish to have use and control of their entire estate (All trusts used during their lives must not violate that desire)
- John and Jane wish to leverage their wealth to provide opportunities to their children, grandchildren and charity both during and after their lifetimes.
 - At the second to die of John and Jane they wish to pass the entire value of their estate to their children and grandchildren

Considerations

- **Option 1** Obtain Wills with Testamentary Trust Provisions including Credit Shelter Trust
- **Option 2** Obtain Wills with All-to-Spouse provisions (in trust or outright) with authority to disclaim wealth into a Credit Sheltered Trust.
- **Option 3** Obtain Pour-Over Wills and a Revocable Living Trust (RTL) with Credit Shelter Trust and Charitable Trust Provisions
- Appoint Trustee Advisory Committee
- Appoint Trust Protector/Consultant
- Appoint distributions amounts upon both John Nylic's death:
- The children shall each receive one half of the estate in trust
 - Children to become
 - Co-Trustee at age 25
 - Sole Trustee at age 35
- All trusts are to be long term trusts to protect the assets of the estate from predatory litigation/creditors, divorce and mismanagement
- The full Estate Tax exemption amounts shall be utilized
- Create Irrevocable Life Insurance Trusts for John and Jane Nylic
- Obtain Living Wills, Powers of Attorney and Guardianship
- Estate Planning Documents are to be stored at the attorney's office

FINANCIAL PLAN ASSUMPTIONS & IMPORTANT DISCLOSURES

ABC Life Insurance Company, its agent, employees or affiliates as well as any other entity, its principal and employees referenced may not give legal, tax or accounting advice. We must necessarily insist that everyone seek and rely upon the advice of his or her own professional advisors and that such advisors must form their own opinions on these matters based upon their independent knowledge and research.

This report provides a general overview of some aspects of your personal financial situation. It is intended to assist you with the review of your current situation and suggest potential planning ideas and concepts that may improve your current overall situation through the use of various financial and estate planning principles. All assumptions are based on information that you have provided. You are solely responsible for the accuracy or completeness of the information you have provided. The accuracy and completeness may affect the results and any recommendation contained in the report.

This report does not attempt to address all financial issues that may impact you, but is limited to the area included in the specific financial or estate strategy prepared for you. Assumed rates of return, rate of inflation and other variables used are hypothetical and should not be interpreted as a guarantee of future returns or results.

All investments involve some degree of risk. There can be no assurances that any investment or insurance strategy will be successful or that individual goals will be achieved. Your actual results will vary based upon your specific individual situation. Any tax aspects presented are for illustrative purposes only and are based on current federal tax law, assumed average tax rates and may include current state and local taxes. Any income tax estimates are made for the current year only and do not consider the possibility of the Alternative Minimum Tax. Results depicting the disposition of property at death and proposed alternatives are general in nature and do not attempt to examine all potential estate planning techniques.

This report provides broad and general guidelines on the advantages of certain financial planning concepts, and does not constitute a recommendation of any particular technique. We recommend that you review your specific plan annually, unless changes in your personal or financial circumstances require more frequent review.

Some charts used to illustrate certain estate planning strategies may not take into consideration growth of your estate and changing state tax rates.

Return assumptions do not reflect the deduction of any (commissions, or fees, or charges that may apply to any particular investment or insurance product considered. Deduction of such charges would result in a lower rate of return. The impact of various factors over a long period of time, including changes in the Tax Code, rates of inflation, rates of return, fluctuation in principal, changes in tax bracket, and the objectives of future generations) cannot be calculated and may have a significant bearing upon the alternatives suggested.

The term "plan" or "planning", when used within this report does not imply that a recommendation has been made to implement a financial or estate planning concept. Nor is it intended to be specific legal, accounting, or tax advice. It rather represents a summary of potential considered strategies. Your individual tax and/or legal adviser should be consulted before implementing any tax or legal strategies contained in this report.

Factors such as tax volatility, interest rates, and behavioral and fundamental market dynamics should be incorporated into overall strategy.

Liquid Assets = "Although proceeds from these assets are easily available and therefore considered relatively liquid, there are consequences that would apply depending on individual circumstances at the time of withdrawal, such as tax penalty and income tax due, which would need to be considered."

Life Insurance Cash Value = "Life insurance accumulated cash value may be accessed through loans and partial surrenders, which if not paid back would decrease the ultimate death benefit. Loans are subject to interest."

Lifetime Income Annuity IRA = "Lifetime income annuity cash value is equal to the amount of the premium recommended to meet your discretionary goals. This is not a cash value or a surrender value."

In the context of this document the following terms are intended to refer to the corresponding definitions:

Human Capital - the stock of a person's competences and character embodied in the ability to produce economic value. In essence their ability to trade time for money.

Liquidity - Assets that can be quickly traded for, or converted to cash.
